[CNRED continues to digitize services by implementing the QR code](#)

CNRED made available, from 2020, to all those interested, through [the Electronic Single Contact Point](#), the online recognition of diplomas obtained abroad and the online authentication of higher education diplomas for those who go abroad.

Continuing its concern to develop tools to facilitate the link between offline and online, **CNRED has recently implemented the QR code on study recognition documents.**

You can use **the QR Code** to connect to the *File Verification Stage* module on [the CNRED website](#), where you can verify / confirm the authenticity of the document issued by CNRED.

The QR code can be scanned using various existing applications on mobile phones. Most of these applications are free, and all you have to do is install one of them on your phone and scan the QR code you want; data encoded in QR code will be automatically uploaded to your phone.

The *File Verification Stage* module can also be used to inform you about the stage of your application for recognition.
