CNRED launched the web platform CNRED.DEQAR.link within the DEQAR CONNECT project

Between 23rd and 24th of May, the working meeting organized by the European Register of Quality Assurance Agencies in Higher Education (EQAR) for the partners of the DEQAR CONNECT project took place in Rome, during which the representatives of the ENIC/NARIC Centers, including the ENIC/NARIC Romania Center, presented the modalities in which the data from the DEQAR database are used within their own electronic platforms and in the recognition workflow and digital accreditation.

On this occasion, the National Center for Recognition and Equivalence of Diplomas – CNRED as an ENIC-NARIC Center launched the web platform CNRED.DEQAR.link, which provides access to relevant information about accredited higher education institutions and study programmes in more than 80 countries.

The new web platform CNRED.DEQAR.link uses the data from the DEQAR database and gives the evaluating experts, but also the general public, the possibility to choose the categories of information displayed, to filter and search for the relevant information according to multiple criteria, to sort and compare the data, as well as to export reports in various formats with the identified information.

*

Please note that the Ministry of Education, through CNRED, is a partner in the European project *Enhancing the Coverage and Connectivity of QA in the EHEA through DEQAR (DEQAR CONNECT)*, funded by the Erasmus+ programme and coordinated by the European Quality Assurance Register for Higher Education (EQAR) and dedicated to the networks of the ENIC/NARIC National Recognition Centres and quality assurance agencies in Higher Education.

The aim of the DEQAR CONNECT project is to expand the involvement of quality assurance agencies in higher education in the European Higher Education Area and to improve connectivity by exploring new opportunities to use DEQAR data directly in the workflow of recognition, digital accreditation, etc.
